

MES Market in North America 2015-2019

The report analyzes and presents an overview of" **MES Market in North America 2015-2019**"worldwide.

About MES

MES is a control system that helps manage and monitor operations on a plant floor. It tracks the entire manufacturing process end to end, from the transformation of raw materials to the final finished product.

MES uses real time data from machines, robots, and employees. For better performance and information flow across the organization, companies are integrating MES with ERP. This allows organizations to improve efficiency by performing operations, such as operation scheduling, lot tracking, resource allocation and control, plant maintenance, labor planning, data acquisition and collection, quality assurance, and process control. MES acts as a communication system between the various parts of a plant and also provides an enterprise-wide record system.

Technavio analysts forecast the MES market in North America to grow at a CAGR of 11.42% during 2014-2019.
